Overview

I began coding small websites with HTML and CSS, then moved into JavaScript, React.js, Next.js, Vue.js, Angular, and backend work with Node.js, Express.js, MySQL, and MongoDB. Later, I expanded into mobile development using React Native, Flutter, Kotlin, and Swift, as well as Python frameworks like Django and Flask. Now I build full-stack, cross-platform applications that are fast, user-friendly, and reliable.

Skills

- **Mobile Development**: React Native, Flutter, Kotlin (Android), Swift (iOS)
- **Frontend Development**: HTML5, CSS3, Sass/SCSS, JavaScript (ES6+), TypeScript, React.js, Next.js, Vue.js
- **Backend Development**: Node.js (Express, NestJS), Firebase (Authentication, Firestore, Cloud Functions), RESTful APIs, GraphQL
- **Databases**: MySQL, MongoDB, Firebase Realtime Database
- **DevOps & Tools**: Git, GitHub, GitLab, CI/CD (GitHub Actions, CircleCI), Docker, Agile & Scrum, VS Code, Android Studio, Xcode
- **Testing & Code Quality**: Jest, React Testing Library, Detox, ESLint, Prettier
- **Cloud & Hosting**: AWS (S3, Lambda, EC2 basics), Firebase Hosting, Vercel, Netlify
- **Soft Skills**: Problem Solving, Team Collaboration, Time Management, Adaptability, Client Communication

Experience

Full Stack Developer, Sonex Digital 2024 – January 2025

- Led the development of a multi-platform e-commerce app serving over 5,000 users monthly, using Next.js for server-side rendering and Flutter for mobile apps, ensuring seamless UX across devices.
- Engineered backend services in Node.js with Express and MongoDB, including a custom order management system supporting order status updates, refunds, and inventory tracking, which decreased order processing time by 20%.
- Designed and implemented a GraphQL API that optimized data fetching, reducing redundant API calls and improving frontend load times by 35%.
- Integrated Stripe payment gateway with robust error handling and secure tokenization, resulting in a 99.8% successful transaction rate.
- Introduced automated testing using Jest and React Testing Library, increasing code coverage from 20% to 70% within 6 months.
- Mentored 3 interns, providing hands-on guidance in React best practices and backend API design; led weekly code review sessions that improved team code quality.
- Collaborated with the product team to define MVP features for a new loyalty rewards program, contributing to feature prioritization and sprint planning.

- Set up CI/CD pipelines with GitHub Actions and Docker containers, cutting deployment downtime to less than 5 minutes.
- Diagnosed and fixed performance bottlenecks in the mobile app, improving app launch speed by 30% through optimized asset loading and caching strategies.

Full Stack Developer Intern, Sonex Digital 2023 – 2024

- Developed a React Native task management app that allowed users to create and assign tasks with deadlines, integrating Firebase Firestore for real-time syncing and push notifications, which reduced missed deadlines by 15% in pilot testing.
- Created a web-based admin dashboard using React.js and Material-UI for internal teams to monitor user activity and task progress, improving team productivity by automating manual reporting processes.
- Implemented Firebase Authentication with email/password and Google Sign-In, reducing user login errors by 40%.
- Wrote reusable React components and hooks to speed up frontend development by 25%.
- Collaborated with UX designers to convert wireframes into interactive UIs, including a drag-and-drop task sorting feature that received positive user feedback in beta testing.
- Used Git and GitHub for version control, actively participating in pull requests and resolving merge conflicts.

Education

BSc in Computer Science Graduated: 2024
National Technical University Kharkiv Polytechnic Institute, Ukraine
Mobile Application Development Certificate 2024
